PRELIMINARY AMENDMENT

Hon. Commissioner of
Patents and Trademarks
Washington, DC 20231

May 1, 2001

Sir:

Preliminary to examination of the above-identified patent application,
please amend the application as follows:

IN THE CLAIMS:

Please cancel claims 1-3 and 5-7, without prejudice.

Please amend claim 4 as follows:

1 4. (Amended) A method for preparing a novel immuno-stimulating
2 polysaccharide substance, comprising the steps of
3 culturing *Phellinus linteus* Yoo (KCTC 0399BP) on media containing
4 glucose, yeast extract and peptone to give mycelia or fruiting bodies;
5 extracting the substance from the mycelia or fruiting bodies by hot water;
6 isolating the substance by precipitating in ethanol, suspending in water
7 and dialyzing with a dialysis tube; and
8 purifying the substance by sequentially executing DEAE-cellulose
9 chromatography and gel chromatography.

Please add new claim 8 as follows:

1 --8. (New) A novel polysaccharide comprising glucose units which are
2 joined by α (1 \rightarrow 4) and β (1 \rightarrow 6) linkages, which is produced by the method according
3 to claim 4.--

REMARKS

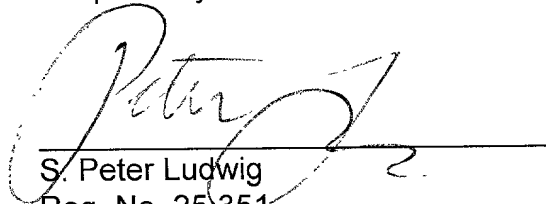

Entry of the foregoing Amendment is requested. As of entry of the Amendment, claims 4 and 8 will be pending. The amended and new claims have written support in the specification and do not add new matter to the application.

Written support for amended claim 4 appears in the specification at claim 4, as filed; Figures 1 and 3; page 9, line 14 to page 10, line 14; and in Examples VIII to X. Written support for new claim 8 appears in the specification at Example XIII.

CONCLUSION

The claims have written support in the specification and do not add new matter. Early examination of the claims on their merits is earnestly solicited.

Respectfully submitted,

S. Peter Ludwig

MARK-UP FOR PRELIMINARY AMENDMENT OF MAY 1, 2001

IN THE CLAIMS:

4. (Amended) A method for preparing a novel immuno-stimulating polysaccharide substance, comprising the steps of

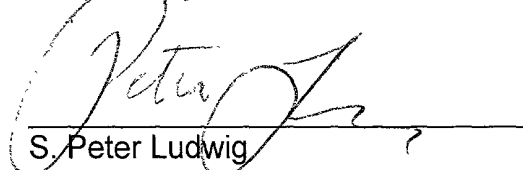

culturing *Phellinus linteus* Yoo (KCTC 0399BP) [strains] on media containing glucose, yeast extract and peptone to give mycelia or fruiting bodies;

extracting the substance from the mycelia or fruiting bodies by hot water;

isolating the substance by precipitating in ethanol, suspending in water and dialyzing with a dialysis tube; and

purifying the substance by sequentially executing DEAE-cellulose chromatography and gel chromatography.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Peter Ludwig", is written over a horizontal line.
